

SUATAINABILITY POLICY

At SUMANGÁ HOTEL BOUTIQUE, we firmly believe in the power of our actions to generate a positive impact on the environment and the community around us. We are committed to sustainable practices that promote social well-being, respect for nature, and local economic development. Below are our main sustainability initiatives:

1. Commitment to Local Employment Generation

We deeply value local talent and therefore prioritize hiring individuals from the Sutatausa community and surrounding areas. We believe in strengthening the local economy by offering job opportunities that drive regional growth.

2. Culture of Environmental Responsibility

We promote a culture of environmental respect and care among our staff, guests, and suppliers. Through educational sessions, signage, and activities, we encourage sustainable habits that support ecological balance.

3. Giving New Life to What Still Has Value

Items no longer in use at our facilities—such as textiles, furniture, or utensils—are donated to community projects and social organizations that can repurpose them. We believe in sharing and reusing to benefit those in need.

4. Care and Respect for Minors

We are committed to protecting children and adolescents in all our activities. All staff members are trained to prevent situations of vulnerability, and we work in partnership with local entities to ensure a safe and respectful environment.

5. Respect for the Natural Environment

SUMANGÁ HOTEL BOUTIQUE is located in a privileged natural setting. Our environmental commitment is reflected in the care we take of every part of the hotel and its surroundings. We organize conservation activities and encourage guest participation in protecting the Farallones and natural resources.

6. Less Plastic, More Life

We strive to eliminate single-use plastics from our operations. We use biodegradable materials and promote reusable containers in both internal operations and guest services.

7. Recycling and Responsible Waste Management

We promote recycling and proper waste separation with clearly marked stations. We also encourage both staff and guests to reduce waste generation at the source.

8. Paper Use Efficiency

We implement digital practices in our administrative processes to reduce paper consumption. When paper use is necessary, we prefer recycled or certified paper and reuse it whenever possible.

9. Protecting Biodiversity Together

We are committed to respecting and preserving the biodiversity around us. We avoid using harmful chemicals and promote responsible wildlife observation, as well as the care of native plant species in our green areas.

10. Our Commitment

At SUMANGÁ HOTEL BOUTIQUE, we understand that sustainable tourism is a shared responsibility. We invite all our guests, team members, and suppliers to actively participate in this mission. We believe small collective actions can lead to meaningful changes that help preserve the beautiful natural and cultural surroundings we call home.

Thank you for joining us on this journey toward a more respectful and conscious approach to tourism.
